A tree fell, what do I do?

- Make sure everyone is ok.
- Take photos of the tree.
- Call your agent. They can determine whether there is coverage or not.
- Hire a contractor to remove the tree and repair any damage.

Trees & Insurance:

Most homeowners insurance does not pay for the removal of a tree unless it has fallen and caused property damage or is blocking a driveway or road.

In Ohio, it does not matter whose property the tree is on, if it falls and causes property damage, the owner of the damaged property is responsible for repairs.
